

**FAMIS v5 Duplicate Screen Numbers between Accounting and Purchasing  
As of 12/5/2005**

Issue: When a duplicate screen number is involved - you cannot link between systems.  
The system will access the available screen from system you started in.  
For Purchasing screens that CCSF does not use, the system displays the error message  
"Cannot link-access violation".

If you do not remember to PAUSE or Clear back in the following situation, you will get an error.  
For approvers, if you start in FAMIS Accounting screen FAML8010 approving documents, then  
link to Purchasing screen PCHL9210-Document Authorization Mailbox and try to  
**link** back to FAML8010, the system will give you a wild card error. Then you need to logoff.  
Linking to any duplicate screen will give you errors.

Resolution: First try pressing your PAUSE or Clear Key to go back to the initial system you  
started in rather than trying to link if it's a duplicate screen number. If that doesn't work, then  
log out of one system and log into other system or set up two sessions-one for  
Accounting and one for Purchasing.

<b>Duplicate Screen No.</b>	<b>FAMIS Accounting Description</b>	<b>FAMIS Purchasing Description</b>
3050	Direct Access (Accounting Screens)	Direct Access (Purchasing Screens)
4000	Financial Processing (Menu)	Inventory Menu (not used)
5100	Organization Codes	Commodity Table
